SUMMARY

Detail-oriented Web Developer skilled in building user-centric, high-performance web applications. Proficient in Python, JavaScript, and modern front-end frameworks like React.js and Tailwind CSS. Adept at leveraging Django for robust back-end solutions and passionate about driving innovation through clean, scalable code.

PROJECTS

DesireCart, E-Commerce Website

- Developed a user-friendly e-commerce platform with seamless navigation and high performance.
- Designed dynamic product listings to boost customer engagement and satisfaction.
- Built using HTML, CSS, JavaScript, Python, and Django for full-stack functionality.

News App

- Created a responsive news application delivering real-time updates from multiple sources.
- Implemented modern UI with HTML, CSS, Tailwind CSS, and React.js for enhanced user experience.
- Integrated news APIs to fetch and display curated content efficiently.

AlertSphere: Disaster Tweet Detector Team Project

- Developed an NLP-based system to classify disaster-related tweets using machine learning.
- Leveraged Python, Scikit-learn, pandas, and matplotlib for data analysis and visualization.
- Collaborated to optimize model accuracy and real-time processing.
